

# CVAT Annotation Guide

This is a step-by-step guide to annotating your images using CVAT.

1. Login/register at <https://app.cvat.ai/auth/login>.
2. Create a new task.

- 2.1. Name the task.
- 2.2. Create a label type polygon.

Basic configuration

\* Name

ice-finder-empiar-10987 ✓

Project

Select project

\* Labels

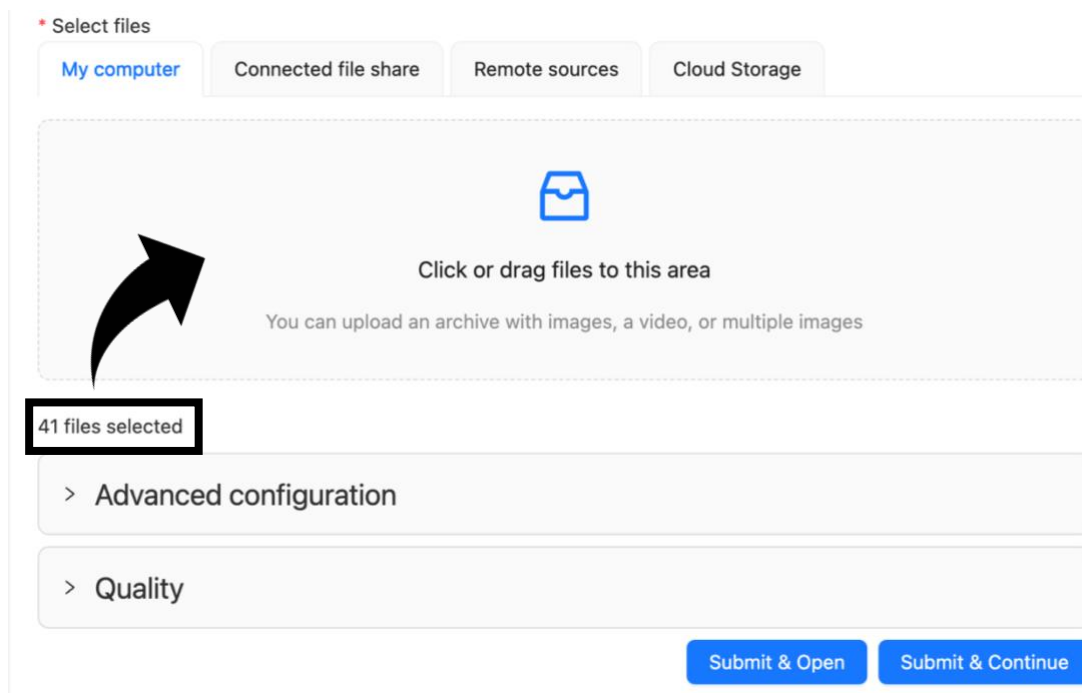

Raw Constructor

crystalline-ice ✓ Polygon ▾  

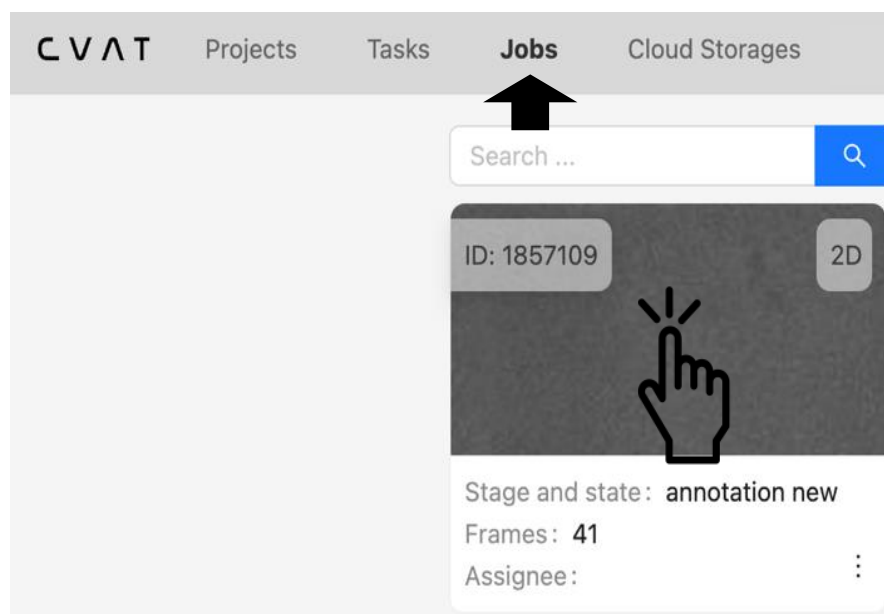

Add an attribute ⊕

Continue Cancel

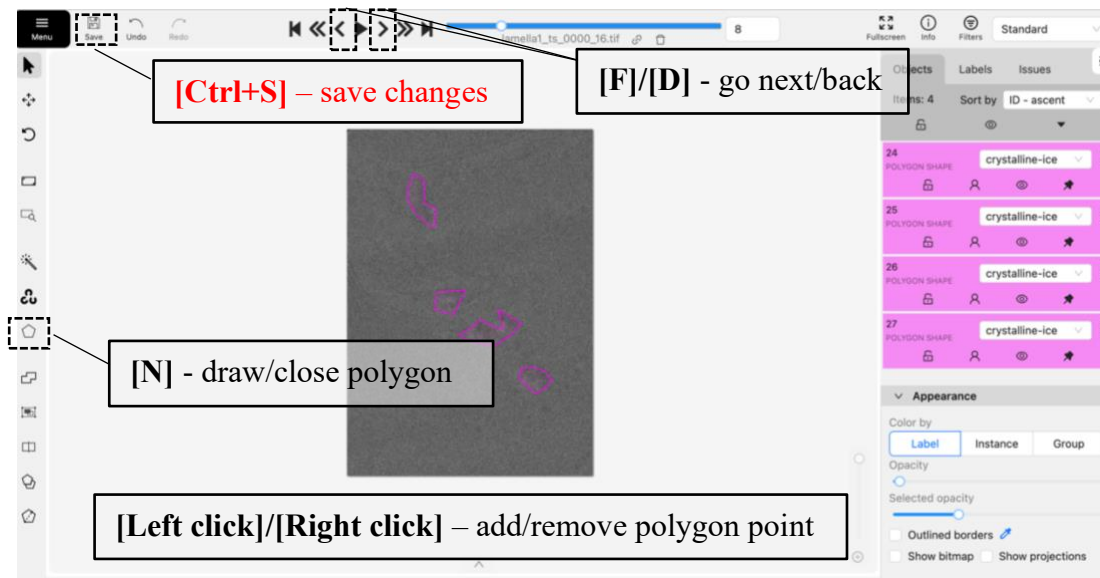

- 2.3. Upload the *selected* folder.
- 2.4. Submit configuration.

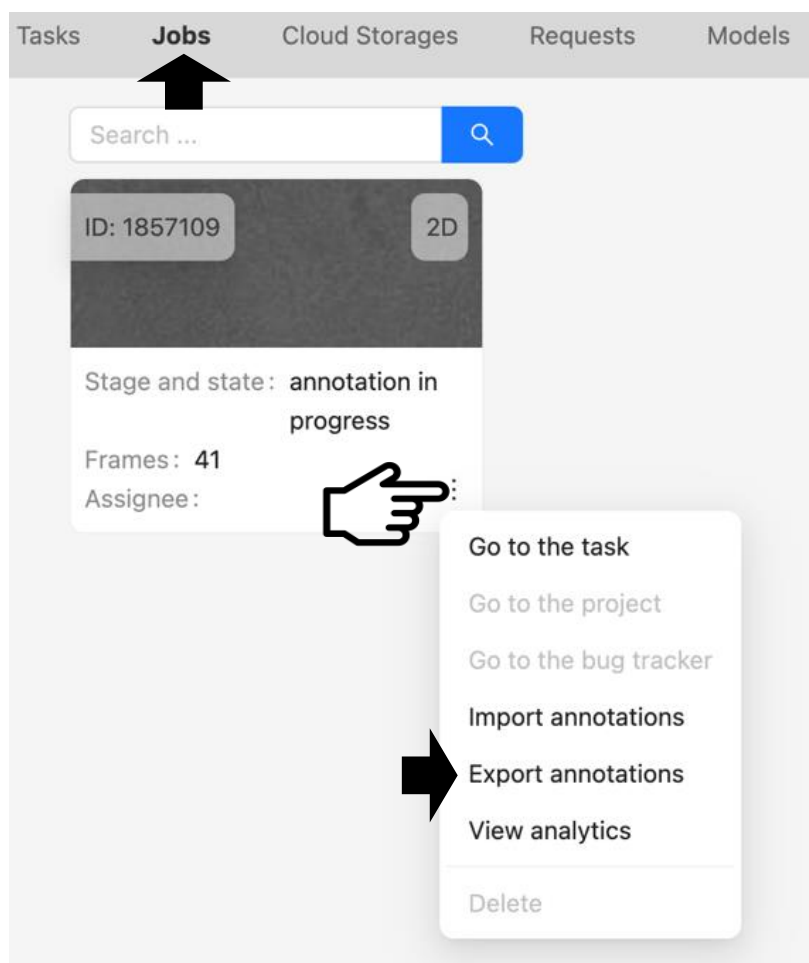

3. Open the new job.

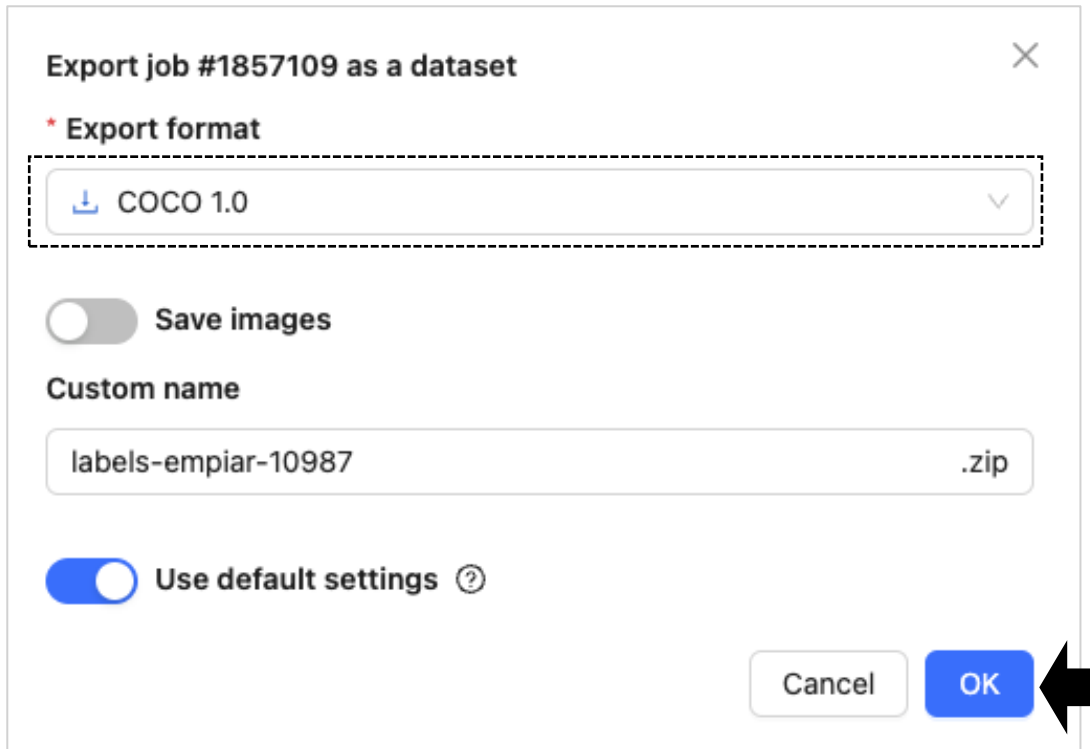

4. Create & store labels.

5. Export annotations.

5.1. Configure dataset as COCO 1.0 format.

Export job #1857109 as a dataset

\* Export format

↓ COCO 1.0

☐ Save images

Custom name

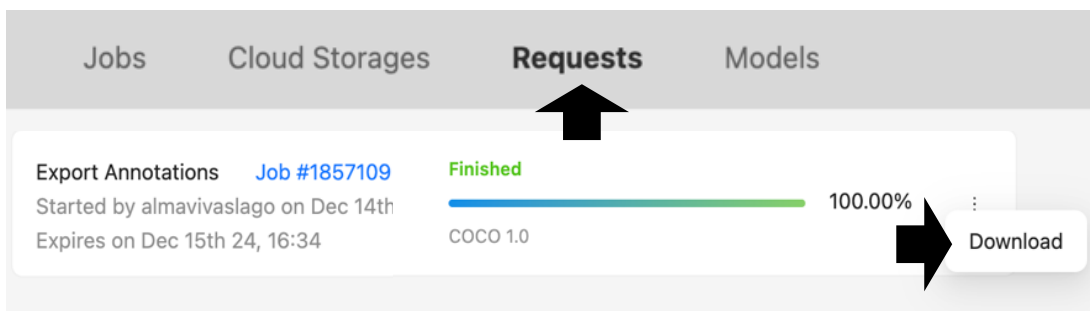

labels-empiar-10987 .zip

☒ Use default settings ?

Cancel OK

A dashed box highlights the 'Export format' dropdown menu. A large black arrow points to the 'OK' button.

5.2. Download labels.
